

Rasci Consultant Services

RCOS Series

Rasci consultant services have all range of process control Instruments (Temperature, Humidity, pressure, voltage, current, flow etc) mechanical measuring instruments (vernier caliber, measuring scale, Micrometer, height gauge etc) , thermal calibration mapping & validation At site . On site calibration process control instruments , furnace, oven Humidity and temperature chamber , clean room etc... we have high Accuracy calibrators with traceable from national standard laboratories. We provide proper calculated calibration certificate suitable for ISO 9000 And quality assurance. We maintain periodically calibration chart.

Rasci also undertaken service, AMC, consultant service and site calibration. Our technical supported with ETDC trained engineers find out solution on Technical issues related to and instruments range or products at anytime.

We provide consultant instruments with national standards traceability certificate from NABL labs. An ISO 9001 : 2008 Quality Certified.

Technical Data

Thermocouple Range	: Ambient to 1200 °C
RTD sensor Range	: -100 to 300 °C
Temperature Instruments	: -200 to 1800 °C
Humidity Range	: 0 to 100 % rh
Pressure Range	: -1 to 700 Bar
Voltage Range	: 0 to 1000 VAC/DC
Current Range	: 0 to 1000 AAC/DC
Mechanical Range	: 0 to 3000 mm
Rota meter Range	: 0 to 50 LPM
Timer Range	: 0.000 sec to 9999 hrs
Multi meter Range	: All parameters (Volt,Amp, Capacitance, frequency etc)
Clamp meter Range	: All parameters (Volt,Amp, Capacitance, frequency etc)
Furnace Range	: Ambient to 1200 °C
Oven Range	: Ambient to 400 °C
